

ERREPLUS®

## Stud Girth

JUMPING

Its ergonomic shape allows for even distribution of pressure both front and back, avoiding pressure points. 4 stainless steel buckles and 3-layered elastic ensure greater strength, durability, and saddle stability.

Central "D" ring suitable for attaching snaps. 2 side "D" rings for martingale/training gears etc. Large central carabiner hook for attaching the martingale, especially suitable for jumping discipline. Particularly recommended during the use of studs, it provides greater protection to the horse's belly.

**Features:**

**Horse conformation:**

Standard conformation, ideal for most horse anatomies with a higher girth, keeping the buckles 6/7 cm from the elbow.

**Colours:**

**Materials:**

Bull leather on the outer side and sweat-resistant leather on the inner side

**Sizes:** 120/125/130/135/140/145 cm

*Please note that the measure of the girth is taken from buckle end to buckle end*

**Care and Maintenance:**

Use our *Leather Cleaner* with pH inverter to maintain the skin's acidity when in contact with the horse. Never store the girth wet with sweat in contact with the saddle seat to avoid dryness and cracking of the seat and flap.
